

## Regarding Security Camera in Office Location

This is to inform you, \_\_\_\_\_ (client) that a security camera is presently located in the office for the purpose of monitoring the office on a regular basis. This is intended to monitor the office if someone breaks into the office after hours as well as to help serve to protect not only myself, the therapist, but yourself, the client, from harm. The camera itself is positioned in a manner to try to obscure your face as much as possible during therapy sessions and protect your identity.

If applicable, any recording that is related to the case in the event things go to court may be utilized. Prior authorization will be requested before this takes place unless the recording is subpoenaed by the court of law. If the court of law requests the footage, you will be notified in advance of this taking place.

By signing below, you acknowledge that a camera is utilized solely for monitoring for theft and for the protection of the therapist and client(s) as a whole. If you have any questions/concerns, please feel free to speak to Thomas Shoffner regarding this.
